

OPTIWAX

2023-24

HydroX

FLUOR
FREE

NEW OPTIWAX NON FLUOR HYDROX PRODUCTLINE OFFERS A RACING WAXING FOR ALL CONDITIONS

Non fluor Hydrox waxes are built up with the new Hydrox technology that increases the hydrophobic characteristics of the wax. This improves glide properties and dirt repellency of the waxes.

HYDROX RACE GLIDERS

HYDROX RACE GLIDER WET +5...-5°C

hydroX race glider wet is fluor free race wax for warm conditions. Strong area of this wax is new snow conditions.

Net weight: 60 g
Product No. 10620601

HYDROX RACE GLIDER MID 0...-10°C

hydroX race glider mid is fluor free race wax for medium cold conditions. At old snow conditions, this wax works warmer than stands on the label.

Net weight: 60 g
Product No. 10630601

HYDROX RACE GLIDER COLD -8...-20°C

hydroX race glider cold is fluor free race wax for cold and aggressive snow. HydroX raw materials will give benefit for this wax especially when humidity is high at these cold conditions.

Net weight: 60 g
Product No. 10640601

HYDROX RACE BLOCKS

HYDROX RACE BLOCK WET +5...-5°C

HydroX race block wet is top coating wax for warm conditions. Beside coating block works also under fluor free glide tape specially at humid conditions. HydroX raw materials will improve glide properties and dirt repellency. As coating use we recommend iron, cork or merino wool attachment.

Net weight: 12 g
Product No. 10610151

HYDROX RACE BLOCK MID 0...-10°C

HydroX race block mid is top coating wax for medium cold conditions. Beside coating block works also under fluor free glide tape specially at humid conditions. HydroX raw materials will improve glide properties and dirt repellency. As coating use we recommend iron, cork or merino wool attachment.

Net weight: 12 g
Product No. 10620151

HYDROX RACE BLOCK COLD -8...-20°C

HydroX race block cold is top coating wax for cold and aggressive snow conditions. Beside coating block works also under fluor free glide tape specially at humid conditions. HydroX raw materials will improve glide properties and dirt repellency. As coating use we recommend nylon brush or merino wool attachment.

Net weight: 12 g
Product No. 10630151

HYDROX LIQUID GLIDERS

NEW

HYDROX LIQUID WET +5...-5°C

HydroX liquid wet is top coating race wax for warm conditions. HydroX raw materials will improve glide properties and dirt repellency.

Volume: 60 ml
Product No. 15620601

NEW

HYDROX LIQUID MID 0...-10°C

HydroX liquid mid is top coating race wax for medium cold conditions. HydroX raw materials will improve glide properties and dirt repellency.

Volume: 60 ml
Product No. 15630601

NEW

HYDROX LIQUID COLD -8...-20°C

HydroX liquid cold is top coating race wax for cold conditions. HydroX raw materials will improve glide properties and dirt repellency.

Volume: 60 ml
Product No. 15640601

HYDROX GLIDE TAPES

GLIDE TAPE 1 HYDROX +5...-10°C

Glide Tape 1 is wax with HydroX technology for cross country skiing, made for high humidity conditions. Wide function range and glide properties on wet and dirty snow makes Glide Tape 1 a great universal glide.

Width 60 mm, length 12,5 m
Product No. 22110101

Width 60 mm, length 250 m
Product No. 22112501

Width 60 mm, length 40 m
Product No. 22110401

GLIDE TAPE 2 HYDROX -5...-20°C

Glide Tape 2 is wax with HydroX technology for cross country skiing, made for high dry conditions. Special OptiWax production process makes Glide Tape 2 extreme durable and hard.

Width 60mm, length 12,5 m
Product No 20120081

Width 60 mm, length 250 m
Product No 20122501

Width 60 mm, length 40 m
Product No 20120401

FLUOR
FREE

GLIDE TAPE 1 WIDE HYDROX +5...-10°C

Glide Tape 1 Wide is wax with HydroX technology for alpine skiing, made for high humidity conditions. Wide function range and glide properties on wet and dirty snow makes Glide Tape 1 a great universal glide.

Width 120 mm, length 12,5 m
Product No. 22210151

Width 120 mm, length 250 m
Product No. 22212501

Width 120 mm, length 25 m
Product No. 22210251

GLIDE TAPE 2 WIDE HYDROX -5...-20°C

Glide Tape 2 Wide is wax with HydroX technology for alpine skiing, made for high dry conditions. Special OptiWax production process makes Glide Tape 2 extreme durable and hard.

Width 120 mm, length 12,5 m
Product No. 22220151

Width 120 mm, length 25 m
Product No. 22222501

Width 120 mm, length 25 m
Product No. 22220251

FLUOR FREE RACE WAXING CONCEPT

OPTIWAX HYDROX GLIDE TAPE WITH HYDROX BLOCKS WILL OFFER TEST WINNER RACE WAXING FOR ALL THE CONDITIONS

GLIDE TAPE HYDROX IS THE HARDEST NON FLUOR WAX ON THE MARKET AND IT HAS EXTREME WIDE WORKING RANGE [41...-4°F / +5...-20 °C].

Hydrox blocks will adjust glide tape hydrophobicity for current conditions and improve glide properties, so it will be easy to create race waxing to different conditions. Optiwax Glide Tape + Hydrox Block has been test widely with different world cup teams and it has been test winner on several snow conditions.

BENEFITS

Glide tape waxing is extremely easy and fast to make extreme hard waxing works well against dirt, what is one of the biggest problems at wet conditions hydrox blocks will adjust needed properties for different conditions glide tape offers extreme durability compare to normal waxes test winner glide tested by different wc teams on different disciplines.

FLUOR FREE HYDROX GLIDE TAPE AND HYDROX BLOCK OFFER OPTIMAL RACE WAX FOR EVERY CONDITION

Glide tape wax is harder than any other wax and offers 3-7 times better durability than normal waxes. Glide tape method makes it possible to produce harder waxes than ever which are still easy to get into the ski.

- 1  CLEAN THE SKI AND OPEN THE STRUCTURE.
- 2  RUB A THIN LAYER OF HYDROX BLOCK TO THE GLIDE ZONE.
- 3  ATTACH SKI TAIL TO THE GLIDE TAPE PACKAGE AND PULL THE GLIDE TAPE OVER THE SKI.
- 4  GLIDE THE IRON (150-160°C) SLOWLY ONTO THE GLIDE TAPE AND PULL THE GLIDE TAPE AWAY.
- 5  USE CORK TO SMOOTH ATTACHED WAX LAYER AND GLIDE THE IRON ONES OVER THE GLIDE SURFACE.
- 6  BRUSH THE SKI IMMEDIATELY WITH OPTIWAX HARD NYLON AND HORSE HAIR BRUSH.
- 7  COOL DOWN THE SKI.
- 8  BRUSH THE SKI WITH OPTIWAX FINE STEEL, BRASS, HORSE HAIR AND HARD NYLON BRUSH.

OPTIWAX RACING WAX CHART

TEMPERATURE	5	4	3	2	1	0	-1	-2	-3	-4	-5	-6	-7	-8	-9	-10	-11	-12	-13	-14	-15	-16	-17	-18	-19	-20
HIGH HUMIDITY >80%	HYDROX WET											HYDROX MID					HYDROX COLD									
	HYDROX 1 GLIDE TAPE																		HYDROX 2 GLIDE TAPE							
MED HUMIDITY 50-80%	HYDROX WET											HYDROX MID					HYDROX COLD									
	HYDROX 1 GLIDE TAPE																		HYDROX 1 GLIDE TAPE							
DRY HUMIDITY <50%	HYDROX WET											HYDROX MID					HYDROX COLD									
	HYDROX 1 GLIDE TAPE																		HYDROX 2 GLIDE TAPE							

TIP: at new snow and also very humid conditions we recommend to make coating with hydrox block on top of the tape waxing. At new snow glide tape waxing with block under has normally little bit too hard wax surface and at very humid conditions hydrox block on the top increase hydrophobicity and improve glide.

GLIDE TAPE ECO PRODUCT LINE

GLIDE TAPE ECO PRODUCT LINE OFFERS BIODEGRADABLE ECO-FRIENDLY PRODUCTS FOR XC AND ALPINE SKIING

By choosing Glide tape eco users will get same extreme durability and user friendly application method than with other glide tapes. Wax itself is extreme wide working range universal wax, so it will be perfect choice for every condition. These glide tapes can be recycled with paper waste.

GLIDE TAPE ECO UNIVERSAL +5...-20°C

Glide tape eco is non-Fluor eco-friendly product for xc-skiing. Product has extreme hard wax material which offers extreme durable and wide working range universal glide. This product can be used also over the skins, when it will improve its function by glide improvement, works against icing and prevent ski to became wet.

Width 60 mm, Length 10 m
Product No 20140100

Width 60 mm, Length 40 m
Product No 20140400

Width 60mm, length 250m
Product No 20142501

GLIDE TAPE ECO WIDE UNIVERSAL +5...-20°C

Glide tape eco is non-Fluor eco-friendly product for Alpine skiing. Product has extreme hard wax material which offers extreme durable and wide working range universal glide. This product can be used also over the skins, when it will improve its function by glide improvement, works against icing and prevent ski to became wet.

Width 120 mm, Length 10 m
Product No 20240100

Width 120 mm, Length 25 m
Product No 20240250

Width 120mm, length 250m
Product No 20242501

GLIDE TAPE ECO FAT UNIVERSAL +5...-20°C

Glide tape eco is non-Fluor eco-friendly product for the wide +120 mm skis. Product has extreme hard wax material which offers extreme durable and wide working range universal glide. This product can be used also over the skins, when it will improve its function by glide improvement, works against icing and prevent ski to became wet.

Width 160mm, length 10m
Product No 20440100

Width 160mm, length 250m
Product No 20342501

GLIDE TAPE ECO BASE WAX ALL TEMP.

Glide tape eco base wax is non-Fluor eco-friendly product for xc-skiing. This is softest glide tape product and work perfectly as base wax for all temperatures. This product can be used also over the skins, when it will improve its function by glide improvement, works against icing and prevent ski to became wet.

Width: 60mm, Length: 40m
Product No. 20150400

Width: 60mm, Length: 250m
Product No. 20152501

GLIDE TAPE ECO WIDE BASE WAX, ALL TEMP.

Glide tape eco wide base wax is non-Fluor eco-friendly product for alpine kiing. This is softest glide tape product and work perfectly as base wax for all temperatures. This product can be used also over the skins, when it will improve its function by glide improvement, works against icing and prevent ski to became wet.

Width: 120mm, Length: 25 m
Product No. 20250250

Width: 120mm, Length: 250 m
Product No. 20252501

FLUOR FREE WAXES

OPTIWAX HYDRO CARBON WAX LINE COVERS ALL OF YOUR GLIDE NEED WAXING NEED AS LIQUID AND HARD WAX FORM

NON FLUOR LIQUID WAXES

NF LIQUID WARM +5...-5°C

NF Liquid warm is non fluor liquid wax, for warm conditions. It's easy to apply to the ski base with sponge bottle. Spread wax to the ski base, wait 15-20 min, brush the ski and it's ready.

Volume: 60 ml
Product No. 4322060

NF LIQUID COLD -5...-20°C

NF Liquid warm is non Fluor liquid wax, for warm conditions. It's easy to apply to the ski base with sponge bottle. Spread wax to the ski base, wait 15-20 min, brush the ski and it's ready.

Volume: 60 ml
Product No. 4342060

NF LIQUID EXTRA HARD +0...-20°C

NF Liquid extra hard is hardest Optiwax liquid wax for old and aggressive snow. It's easy to apply to the ski base with sponge bottle. Spread wax to the ski base, wait 15-20 min, brush the ski and it's ready.

Volume: 60 ml
Product No. 35520901

NON FLUOR GLIDERS

NF 2 +2...-10°C

Made of high quality ingredients. This wax is the perfect choice for warm new snow conditions.

Net weight: 60 g
Product No. 33220601

Net weight: 300 g
Product No. 33223000

NF 3 -3...-20°C

NF3 wax has very wide working range and it's our most used NF wax. It is extremely durable and fast also in warmer conditions than stands on the label.

Net weight: 60 g
Product No. 33320603

Net weight 300 g
Product No. 33323000

NF 4 -10...-30 °C

For cold and aggressive snow. Extremely durable and fast on those conditions.

Net weight 60 g
Product No. 33420601

Net weight: 300 g
Product No. 33423000

FLUOR GLIDERS

We are inspired to offer well-tested and versatile products. We have strived to keep our product line as simple as possible in order to make choosing the right wax as easy as possible. These NF, LF, HF and EHF waxes are developed to cover all of your glide waxing needs.

LF 2 +2...-10°C

Made of high quality ingredients. This wax is the perfect choice as basic wax and it provides an excellent base layer for all kind of race waxes.

Net weight: 60 g
Product No. 30220601

Net weight: 300 g
Product No. 30223002

LF 3 -3...-20°C

LF3 is low Fluor concentration wax with wide working range. It is extremely durable and fast also in warmer conditions than stands on the label.

Net weight: 60 g
Product No. 30320603

Net weight: 300 g
Product No. 30323002

LF 4 -10...-30 °C

For cold and aggressive snow. Extremely durable and fast on those conditions and it offers excellent base for race waxing in the cold conditions.

Net weight: 60 g
Product No. 30420601

Net weight: 300 g
Product No. 30423002

BASE LF +10...-20 °C

Medium hard Universal low Fluor wax for base preparation and good choice for a universal glider

Net Weight: 60g
Product No. 30120601

Net weight: 300g
Product No. 30223000

HF 2 +2...-10 °C

Made with the same components as the LF2 wax but it has a far higher fluor concentration. For very humid conditions. Works perfectly as a base layer for Optiwax powders and blocks.

Net weight: 60 g
Product No. 30320601

HF 3 -3...-20 °C

High Fluor concentration wax with wide working range. It's extremely durable and fast also in warmer conditions. This wax is most used Optiwax High Fluor wax in race waxing.

Net weight: 60g
Product No. 30330602

HF 4 -10...-30 °C

Best choice for cold and dry conditions. It's optimized for cold and aggressive snow, wax can be used alone for racing in these harsh conditions. Very durable in these harsh conditions.

Net weight: 60 g
Product No. 30340601

EHF NEW SNOW +5...-8°C

Optiwax EHF new snow is special race wax for new snow conditions. Product have extreme high Fluor concentration and it has very hard wax materials, due of this it has very wide working range and extreme durability. Wax is perfect choice for the new snow race waxing.

Weight: 60 g
Product No. 30430601

EHF OLD SNOW +0...-20°C

Optiwax EHF old snow is special race wax for old snow conditions. Product have extreme high Fluor concentration and it has very hard wax materials, due of this it has very wide working range and extreme durability. Wax is perfect choice for the old snow race waxing.

Weight: 60 g
Product No. 30440601

GLIDE TAPES

OPTIWAX GLIDE TAPE IS THE EASIEST WAY TO WAX SKIS AND SNOWBOARDS

THE PERFECT PLEASURE OF SKIING CAN ONLY BE ACHIEVED WITH EXCELLENT GLIDE

When the glide wax is long-lasting, fast, and easy to use, you can enjoy the best of skiing every time. Our Optiwax glide tapes are the number one choice, especially for beginners. Tape waxing can be done without any special waxing equipment and it results in almost racing level glide for up to 200 kilometers.

The glide tapes are also widely used by ski racers – the durability has offered many great results in long ski marathon races. The glide tape is also the perfect choice for skiing holidays due to the fact that one single visit to the wax room offers great glide for many days. World class athletes also appreciate the extreme durability and ease-of-use of our Optiwax glide tapes. Optiwax has three different widths of glide tape for XC-skiing, alpine skiing, and snowboarding.

GLIDE TAPES FOR XC-SKIING

GLIDE TAPE 1 HYDROX +5...-10°C

Glide Tape 1 is wax with HydroX technology for cross country skiing, made for high humidity conditions. Wide function range and glide properties on wet and dirty snow makes Glide Tape 1 a great universal glide.

Width 60 mm, length 12,5 m
Product No. 22110101

Width 60 mm, length 40 m
Product No. 22110401

Width 60 mm, length 250 m
Product No. 22112501

GLIDE TAPE 2 HYDROX -5...-20°C

Glide Tape 2 is wax with HydroX technology for cross country skiing, made for high dry conditions. Special Optiwax production process makes Glide Tape 2 extreme durable and hard.

Width 60mm, length 10 m
Product No 20120081

Width 60 mm, length 40 m
Product No 20120401

Width 60 mm, length 250 m
Product No 20122501

GLIDE TAPE UHF +1...-20°C

Black Optiwax Glide tape UHF is hardest and most durable glide tape. Ultra high Fluor concentration makes the working range of product extremely wide.

Width: 60mm, Length: 10m
Product No. 20130101

Width: 60mm, Length: 40m
Product No. 20130401

Width: 60mm, Length: 250m
Product No. 20132501

GLIDE TAPE ECO UNIVERSAL +5...-20°C

Glide tape eco is non-Fluor eco-friendly product for xc-skiing. Product has extreme hard wax material which offers extreme durable and wide working range universal glide.

Width 60 mm, Length 10 m
Product No 20140100

Width 60 mm, Length 40 m
Product No 20140400

Width 60mm, length 250m
Product No 20142501

GLIDE TAPE ECO BASE WAX ALL TEMP.

Glide tape eco base wax is non-Fluor eco-friendly product for xc-skiing. This is softest glide tape product and work perfectly as base wax for all temperatures. This product can be used also over the skins, when it will improve its function by glide improvement, works against icing and prevent ski to became wet.

Width: 60mm, Length: 40m
Product No. 20150400

Width: 60mm, Length: 250m
Product No. 20152501

GLIDE TAPES FOR ALPINE SKIS

GLIDE TAPE 1 WIDE HYDROX +5...-10°C

Glide Tape 1 Wide is high fluor wax for alpine skiing, made for high humidity conditions. Wide function range and glide properties on wet and dirty snow makes Glide Tape 1 a great universal glide.

Width 120 mm, length 12,5 m
Product No. 22210151

Width 120 mm, length 250 m
Product No. 22212501

Width 120 mm, length 25 m
Product No. 22210251

GLIDE TAPE 2 WIDE HYDROX -5...-20°C

Glide Tape 2 Wide is high fluor wax for alpine skiing, made for high dry conditions. Special Optiwax production process makes Glide Tape 2 extreme durable and hard.

Width 120 mm, length 12,5 m
Product No. 22220151

Width 120 mm, length 25 m
Product No. 22222501

Width 120 mm, length 25 m
Product No. 22220251

GLIDE TAPE ECO WIDE BASE WAX ALL TEMP.

Glide tape eco wide base wax is non-Fluor eco-friendly product for alpine kiing. This is softest glide tape product and work perfectly as base wax for all temperatures. This product can be used also over the skins, when it will improve its function by glide improvement, works against icing and prevent ski to became wet.

Width: 120mm, Lenght: 25 m
Product No. 20250250

Width: 120mm, Lenght: 250 m
Product No. 20252501

GLIDE TAPE UHF WIDE +1...-20°C

Black Optiwax Glide tape UHF is hardest and most durable glide tape. Ultra high Fluor concentration makes the working range of product extremely wide.

Width: 120mm, Lenght: 10 m
Product No. 20230101

Width: 120mm, Length: 25 m
Product No. 20230251

Width: 120mm, Length: 250 m
Product No. 20232501

GLIDE TAPES FOR SNOWBOARDS

GLIDE TAPE 1 EXTRA WIDE +5...-10°C

Glide Tape 1 Extra Wide is high fluor wax for snowboards, made for high humidity conditions. Wide function range and glide properties on wet and dirty snow makes Glide Tape 1 a great universal glide.

Width 320mm, length 3,2m
Product No 20310321

GLIDE TAPE 2 EXTRA WIDE -5...-20°C

Glide Tape 2 Extra Wide is high fluor wax for snowboards, made for high dry conditions. Special Optiwax production process makes Glide Tape 2 extreme durable and hard.

Width 320mm, length 3,2m
Product No 20320321

CARE AND CLEANING PRODUCTS

THE NEXT GENERATION OF CHEMICAL NANO COATING TREATMENTS THAT WE EMBODIES OUR GOAL TO OFFER SKIS THAT WORK PROPERLY WITHOUT ANY WAXING, WHICH MEANS MORE TIME ENJOYING YOUR JOURNEY ON SNOW.

This pioneer in waxless surfaces is being manufactured under the brand names Optigrip and Nanogrip. The secret of simultaneous glide and grip rests in the control of static and kinetic friction in different conditions. Grip and glide properties of the ski are based on the interaction of nano pores and the chemical construction of our coating material with snow. To ensure the best functionality of your skis, it is essential to use the correct care products for the surface in order to keep the surface pores open. Using Optiwax conditioners, you can be sure that the treatment is suitable for this unique surface and you will get the best out of your Etouch, Optigrip and Nanogrip skis.

GRIPCARE®

Hydrocarbon free Gripcare will increase function of Etouch, Optigrip and Nanogrip skis. It will increase glide and grip properties, it will ease initialization of new pair of skies and decrease freeze problems. Optiwax Gripcare® fluid is easy to spread on the ski with sponge plug. Yoko recommends Gripcare® service product for Optigrip skis.

Volume 60ml
Product No. 60091001

GRIPCARE® COLD

This product is to develop glide properties of Etouch, Optigrip and Nanogrip skis at cold conditions. it will ease initialization of new pair of skies and decrease freeze problems. Optiwax Gripcare® Cold fluid is easy to spread on the ski with sponge plug. Yoko recommends Gripcare® service product for Optigrip skis.

Volume 60ml
Product No. 60091004

GRIPCLEANER® ECO

Dirt effects Optigrip® -skis glide and grip properties. Optiwax Gripcleaner® ECO will return those properties. It cleans the ski whitout damaging the surface. After Grip-cleaner® treatment use of Gripcare® is recommended. Gripcare eco is biodegreable and environmental friendly.

Volume 60ml
Product No. 60090601

SKINCLEANER

Optiwax Skincleaner is dirt repellent clean and care product for skin-skis. Skincleaner cleans effectively skis mohair hair from the dirt.

Volume: 170 ml
Product No 60091003

DIRT REMOVER

Dirt Remover is biodegradable cleaning agent, which removes dirt effectively from the glide zones. It is hydrocarbon solvent free product so it has minimal effect on the glide wax at ski. At dirty conditions ski can be cleaned with dirt remover and afterwards brush the base and continue with same waxing.

Volume: 170 ml
Product No 60091701

SKIN CARE & GLIDE

Skin care & glide works as a cleaning agent and same time it will decrease freezing problems and increasy dirt repellency, glide properties of skin. Perfect product around "zero degree" conditions.

Volume: 60 ml
Product No 61090601

PRO TIP

Optiwax Skincleaner® and Glide Tape are perfect combo for skin-ski owner. Glide Tape waxing over the mohair offers perfect glide, prevent ski to became wet, works against dirt and skincleaner cleans the ski when its needed.

LIQUID WAXES

OPTIWAX LIQUID WAXES OFFERS SAME PROPERTIES AS NORMAL BLOCK WAXES AT LIQUID FORM

EHF LIQUID NEW SNOW +5...-8°C

Optiwax EHF SPRAY new snow is special race wax for new snow conditions. Product have extreme high Fluor concentration and it has very hard wax materials, due of this it has very wide working range and extreme durability as a liquid wax. Wax is perfect choice for the new snow race waxing.

Volume: 60 ml
Product No. 40430601

EHF LIQUID OLD SNOW +0...-20°C

Optiwax EHF liquid old snow is special race wax for new snow conditions. Product have extreme high Fluor concentration and it has very hard wax materials, due of this it has very wide working range and extreme durability as a liquid wax. Wax is perfect choice for the old snow race waxing.

Volume: 60 ml
Product No. 40440601

LIQUID HF -20...+10°C

This quick liquid glide wax is suitable for all kind of snow types at wide temperature range, on its best when used on top of paraffin waxes. Great for skiers who want a well-performing quick glide. Shake, apply, let dry, polish and go skiing.

Volume: 60 ml
Product No: 4500600

FLUOR POWDER LIQUID +10...-5°C

Optiwax Fluor Powder liquid is race Fluor coating for the humid conditions. It is update version of liquid HF, which has been widely used at racing. Fluor Powder liquid has slightly improved glide properties at humid conditions compare to liquid HF. Also this products is on its best when used on top of paraffin waxes.

Volume: 60 ml
Product No: 4500700

FLUOR POWDERS

Optiwax Fluor powder products are made especially for racing. These cutting edge waxes are a combination of award winning technology, knowledge, and experience. This combination has resulted in fast, durable, and versatile powder waxes for racers who only want the best.

PFOA FREE

FLUOR POWDER 0 WET, OLD SNOW +10...-8°C

The yellow Optiwax Fluor Powder 0 Wet is for old snow and wet conditions.

Net weight 25 g
Product No. 50000252

PFOA FREE

FLUOR POWDER 1 MID +2...-10°C

The red Optiwax Fluor Powder 1 is the choice for the new snow conditions.

Net weight 25 g
Product No. 50010252

PFOA FREE

FLUOR POWDER 2 COLD -8...-20°C

The white Optiwax Fluor Powder 2 is a special powder for extremely cold conditions.

Net weight 25 g
Product No. 50020252

HARD POWDER -10...-20°C

The Blue Optiwax Hard Powder is for cold and aggressive snow conditions.

Net weight 25 g
Product No. 50050251

PFOA FREE

GRIP POWDER

Optiwax Grip powder is developed for race skiers who want to improve glide properties of their gripwax.

Net weight 25 g
Product No. 50090251

FLUOR BLOCKS

Optiwax Fluor blocks can be used in multiple ways in race waxing. With simply three different blocks, you are able to create a world class glide for every condition. Together with a glide tape, Fluor blocks retain glide extremely long. That is why our Fluor blocks have been so popular among long distance racers. Optiwax Fluor blocks are a fast and easy way to create world cup level glide.

PFOA FREE

FLUOR BLOCK 1 +4...-2°C

The Optiwax Fluor Block 1 is the best choice on new snow around zero degrees.

Net weight 15 g
Product No. 40010151

Net weight: 5 g
Product No. 40010051

PFOA FREE

FLUOR BLOCK 2 -2...-8°C

The Optiwax Fluor Block 2 is a widerange block for old and artificial snow.

Net weight: 15 g
Product No. 40020151

Net weight: 5 g
Product No. 40020051

PFOA FREE

FLUOR BLOCK 3 -8...-20°C

The Optiwax Fluor Block 3 is made for new fine structured snow in cold conditions.

Net weight: 15 g
Product No. 40030151

Net weight: 5 g
Product No. 40030051

GRIPWAXES

Our Optiwax Gripwax line includes products that have optimized properties for different temperature ranges. We have chosen to this simple gripwax line best possible products for different temperature ranges.

GRIP WAX 0 +2...-2°C

The Optiwax Gripwax 0 is a wax for conditions around zero. Good properties against icing.

Net weight 45g
Product No. 9000201

GRIP WAX 1 0...-3°C

The Optiwax Gripwax 1 is below zero wax with aggressive grip properties.

Net weight 45g
Product No. 90001201

GRIP WAX 2 -1...-6°C

The Optiwax Gripwax 2 Provides aggressive grip for cold conditions.

Net weight 45g
Product No. 90002201

GRIP WAX 3 -2...-10°C

Optiwax Gripwax 3 is universal grip wax for cold temperatures.

Net weight 45g
Product No. 90003201

IS MORE TIME
FOR SKING**

Optiwax is a Finnish wax brand for snowboarding, alpine skiing and cross country skiing. The products are developed by an award winning company, led by a large group of powerful players in the ski world. Their enthusiastic and long term efforts strive to deliver more pleasurable skiing by making the preparation of skis as easy as possible. Besides ski waxes, our nano-technology is also used in waxless cross country skis, which won the most prestigious innovation award in Finland in 2010.

Our goal is to make preparing skis easier and faster, which means you can spend more time enjoying your skis and less time maintaining them. After several years of testing, we are happy to bring the Optiwax collection of ski waxes to the market. Optiwax has a broad product line for both beginners and professionals. Optiwax Glide Tapes are the easiest choice for beginners, but thanks to their excellent gliding properties and extremely good durability they are also widely used among racing athletes. Fluor powders, blocks, gliders, glide tapes, and grip waxes are named by using the numbers from zero to three ensuring total ease of choice. The Optiwax products for wax free skis will help Nanogrip, Optigrip and etouch ski owners take care of their ski equipment.
